

# PRODUCT PROFILE

## Soybeans

# 2702R

2750 CHU

### Key Strengths

- Very well suited to no-till planting
- Great field tolerance to Phytophthora root rot
- Strong emergence and overall plant health
- Tolerant to over top application of Roundup Original® and Roundup Transorb™

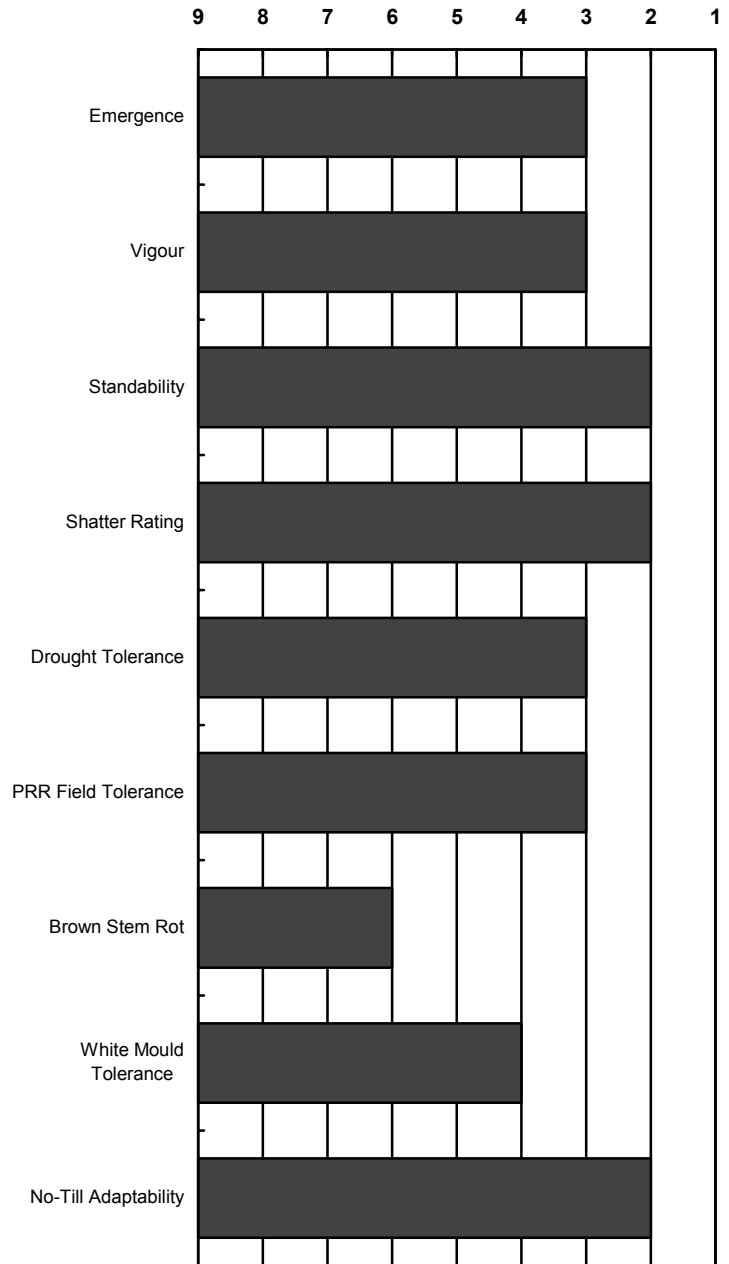

### Plant Description

<b>Growth Habit</b>	Intermediate
<b>Flower Colour</b>	Purple
<b>Pubescence Colour</b>	Tawny
<b>Hilum Colour</b>	Black
<b>Plant Height</b>	Medium tall
<b>Bottom Pod Height</b>	Average
<b>Approx. Seed Size</b>	5500 seeds/kg
<b>PRR Resistance Gene</b>	-
<b>Protein Content</b>	Average
<b>Oil Content</b>	Average

### Management Tips

- Great yield potential on loam to clay loam soils
- Excellent choice for no-till planting or conventional systems
- Slender variety suited to narrow and medium row widths
- For best results use Roundup Transorb

### Product Characteristics<sup>1</sup>

<sup>1</sup>Based on First Line-conducted trials. Relative to other First Line varieties.  
 Rating Scale: 1-2=Excellent, 3-4=Very Good, 5-6=Good, 7-8=Fair, 9=Poor.  
 Tolerance ratings refer to PRR races not covered by specific PRR resistant genes.
