The agronomic ratings stated in the product characteristics charts were developed from Monsanto's internally conducted trials, which utilize commonly accepted methodology. These ratings can be used for comparative purposes between our established hybrids and new releases. They may not reflect total comparative performance. Actual performance may vary based on a number of factors including, without limitation, the prevalence of disease causing organisms or insect pest and environmental and agronomic conditions

Before opening a bag of seed, be sure to read and understand the stewardship requirements, including applicable refuge requirements for insect resistance management, for the biotechnology traits expressed in the seed as set forth in the Monsanto Technology Agreement that you sign. By opening and using a bag of seed, you are reaffirming your obligation to comply with those stewardship requirements.
