

N23-F9

Maturity: 2675 CHU

Canada 2006-2007

An excellent combination of high yield and strong stalks. This compliment hybrid to N22-Q4 provides improved roots and harvestability.

Descriptive Traits

Herbicide Traits	LL
Insect Traits	-
Extra Edge	-
Relative Maturity (CHU)	2675
CHU: Range	2600-2750
GDUs: Mid-Silk	1200
GDUs: Black Layer	2225

Agronomic Traits

Yield for Maturity	1
Drydown	1
Test Weight	2
Stalk Strength	3
Root Strength	5
Drought Tolerance during Grain Fill	2
Mid-Season Greensnap	5
Staygreen	3
Late Intactness	4
Drydown	1
Response to Low Density	2
Response to High Density	2
Plant Height	Medium
Ear Height	Medium
Ear Type	Semi-Flex
Husk Cover	Medium
Kernel Depth	Deep
Kernel Texture	Medium
Ear Shape	Blocky

Disease and Insect Ratings

Crown Rot	-
NCLB	-
Gray Leaf Spot	-
GLS Eastern Strain	-
Eyespot	-
Common Rust	-
Stewart's Bacterial Wilt	-
ECB - 1st Generation	1*
ECB - 2nd Generation	1**

Herbicide Sensitivity

Callisto (Mesotrione)	-
Growth Regulators	-
ALS Inhibitors	-

Silage Traits

CHU:Silage	-
Silage Yield	-
NDF Content	-
NDF Digestibility	-
>60% Corn Silage	-
>60% Alfalfa	-
50/50 Corn Silage/Alfalfa	-
Whole Plant Digestibility	-
Forage Starch	-
Beef Ration	-
Silage Protein Content	-
