

N29-A2

Maturity: 2800 CHU

Canada 2006-2007

High yielding with excellent emergence and early growth, this performer has very good stalks and drydown for ease of harvest.

Descriptive Traits

Herbicide Traits	LL
Insect Traits	CB
Extra Edge	HES
Relative Maturity (CHU)	2800
CHU: Range	2800-2900
GDUs: Mid-Silk	1225
GDUs: Black Layer	2350

Agronomic Traits

Yield for Maturity	1
Drydown	3
Test Weight	4
Stalk Strength	3
Root Strength	3
Drought Tolerance during Grain Fill	3
Mid-Season Greensnap	4
Staygreen	5
Late Intactness	5
Drydown	3
Response to Low Density	3
Response to High Density	2
Plant Height	Medium
Ear Height	Medium
Ear Type	Fixed
Husk Cover	Medium
Kernel Depth	Medium
Kernel Texture	Medium
Ear Shape	Semi-Blocky

Disease and Insect Ratings

Crown Rot	G
NCLB	E
Gray Leaf Spot	G
GLS Eastern Strain	-
Eyespot	E
Common Rust	-
Stewart's Bacterial Wilt	-
ECB - 1st Generation	1
ECB - 2nd Generation	1

Herbicide Sensitivity

Callisto (Mesotrione)	Normal
Growth Regulators	Caution
ALS Inhibitors	Normal

Silage Traits

CHU:Silage	2650-2800
Silage Yield	1
NDF Content	L
NDF Digestibility	3
>60% Corn Silage	VG*
>60% Alfalfa	EX
50/50 Corn Silage/Alfalfa	VG
Whole Plant Digestibility	3
Forage Starch	H
Beef Ration	EX
Silage Protein Content	4
