

N33-D2

Maturity: 2900 CHU

Canada 2006-2007

Expect big tonnes per acre with our elite Bt silage hybrid. N33-D2 delivers highly digestible NDF and soft starch kernels - key for the quality-conscious dairy operator.

Descriptive Traits

Herbicide Traits	LL
Insect Traits	CB
Extra Edge	-
Relative Maturity (CHU)	2900
CHU: Range	2750-3000
GDUs: Mid-Silk	1335
GDUs: Black Layer	-

Agronomic Traits

Yield for Maturity	-
Drydown	-
Test Weight	-
Stalk Strength	-
Root Strength	2
Drought Tolerance during Grain Fill	3
Mid-Season Greensnap	1
Staygreen	-
Late Intactness	3
Drydown	-
Response to Low Density	1
Response to High Density	4
Plant Height	Tall
Ear Height	Medium-High
Ear Type	Semi-Flex
Husk Cover	Medium
Kernel Depth	Medium
Kernel Texture	Soft
Ear Shape	Slender

Disease and Insect Ratings

Crown Rot	-
NCLB	-
Gray Leaf Spot	-
GLS Eastern Strain	-
Eyespot	-
Common Rust	-
Stewart's Bacterial Wilt	-
ECB - 1st Generation	1
ECB - 2nd Generation	1

Herbicide Sensitivity

Callisto (Mesotrione)	Normal
Growth Regulators	Normal
ALS Inhibitors	Normal

Silage Traits

CHU:Silage	2700-3000
Silage Yield	1
NDF Content	H
NDF Digestibility	2
>60% Corn Silage	EX
>60% Alfalfa	VG
50/50 Corn Silage/Alfalfa	VG**
Whole Plant Digestibility	3
Forage Starch	L
Beef Ration	R
Silage Protein Content	-
